## Prowler Over the Tire Tracks for Skid Steers

Do you want to improve the traction and flotation of your skid steer? Let us introduce you to the Prowler over-the-tire track systems (OTT).

**Predators**

**Fusions** Pads On-Installed

**Fusions** Pads Installed

**Stealths**

Built of high chromium and manganese steel components, our over-the-tire track systems are designed to withstand extreme conditions and provide hundreds of hours of service. The Prowler OTT Tracks are very cost effective, as all components are replaceable. Each set comes with a free installation kit and can be installed in less than an hour, under ideal conditions.

### Predator OTT Tracks

The Prowler Predator steel track system is an economical way of equipping your skid steer loader with OTT tracks. 10 and 12 inch Predators are available for under \$2000! A set of Predators provide increased flotation in muddy conditions, as well as serious grip and traction in rough, uneven terrain. The open double bar design allows for easy displacement of soft soils and debris during normal operation.

The Predator track system is compatible with skid steers utilizing 10×16.5, 12×16.5, or 14×17.5 pneumatic tires.\*

### Fusion OTT Tracks

The patented Prowler Fusion is the industry's only 2-n-1 over-the-tire track system. The Fusion system consists of a double grouser steel track design with optional bolt-on rubber pads. When operated with the high durometer rated rubber pads, the system provides results similar to our stealth track system: high flotation coupled with a smoother ride and protection to sensitive surfaces. The Fusion rubber pads can easily be mounted and dismounted by one person. When used without the rubber pads, the fusion tracks offer performance similar to a steel excavator or dozer track.

The Fusion track system is compatible with skid steers utilizing 10×16.5 and 12×16.5 pneumatic tires.\*

### Stealth OTT Tracks

The Prowler Stealth OTT system provides the highest flotation while traveling over sand, loose gravel and mud. The easily replaceable rubber pads provide a smoother ride for the operator, while eliminating damage to asphalt, concrete and other sensitive surfaces. The high quality rubber pads provide many hours of worry-free service. Four bolts secure each rubber pad to the steel chain, making it easy to access and replace the pads as necessary.

The Stealth track system is compatible with skid steers utilizing 10×16.5 and 12×16.5 pneumatic tires.\*

Each set of Prowler OTT Tracks will come with a Installation tool kit with all of the items shown to the right.

Use your Smart Phone to download the **Prowler OTT Install Manual** by scanning the QR Code at the bottom right corner of this page.
